MIX8010 is a battery operable electrochemical carbon monoxide sensor developed by Mixsen. Carbon monoxide and oxygen on the working electrode and counter electrode are subjected to oxidation-reduction reaction correspondingly. This produces the electric current. The current is directly proportional to the concentration of carbon monoxide and following the Faraday's law. Through measure the current to get the concentration of carbon monoxide.

## Sensitivity Characteristics:

MIX8010 (25° C) linear output

## Temperature dependency:

MIX8010 temperature dependency

## Stability Characteristics:

**Notice:** In different applications used by different customers, the operation condition is different. Mixsen strongly recommend customers contact with Mixsen's technician, especially when the detect gases are not in target gases list, Mixsen cannot responsible if customers has not asked for specifically tested by Mixsen.
